How to Thrive During Uncertainty

Times feel uncertain. During uncertainty, our actions need to be intentional. Thriving in this season is possible by implementing a few daily, simple self-care strategies.

GROW Counseling, based out of the Metro Atlanta area, developed this survival guide designed to help you engage in self-care during this difficult time. This tool will guide you to focus on elements within your daily activities you can control. It will help you stay grounded and intentional every day. The guide includes essential self-care strategies, extra self-care strategies, and other-care strategies. GROW Counseling has additional free resources for you at growcounseling.com/resources.

Many counseling centers are offering telemental health services at this time. This means counseling services are offered remotely via phone or video conferencing.

table of contents

essential self-care strategies

Learn the essential self-care strategies necessary to thrive in this season.

extra self-care strategies

Discover extra self-care strategies that are the most helpful to you personally.

other-care strategies

Explore ways to take care of other people and create a list to use with your daily guides.

emotion regulation

Grow in your ability to identify your emotions. Every day you will be prompted to identify how you feel.

self-assessment journaling prompts

Take time to evaluate how you are handling this season and what you will need to thrive.

daily survival guides

Once you complete the above sections, you're ready to begin using the daily survival guides. There is an example to show you how to use the 15 guides.

essential self-care strategies

The essential strategies to self-care include healthy sleep patterns, drinking plenty of water, exercise, getting fresh air, personal hygiene, and maintaining a daily routine. Each day you will be prompted to be intentional with each strategy.

healthy sleep patterns

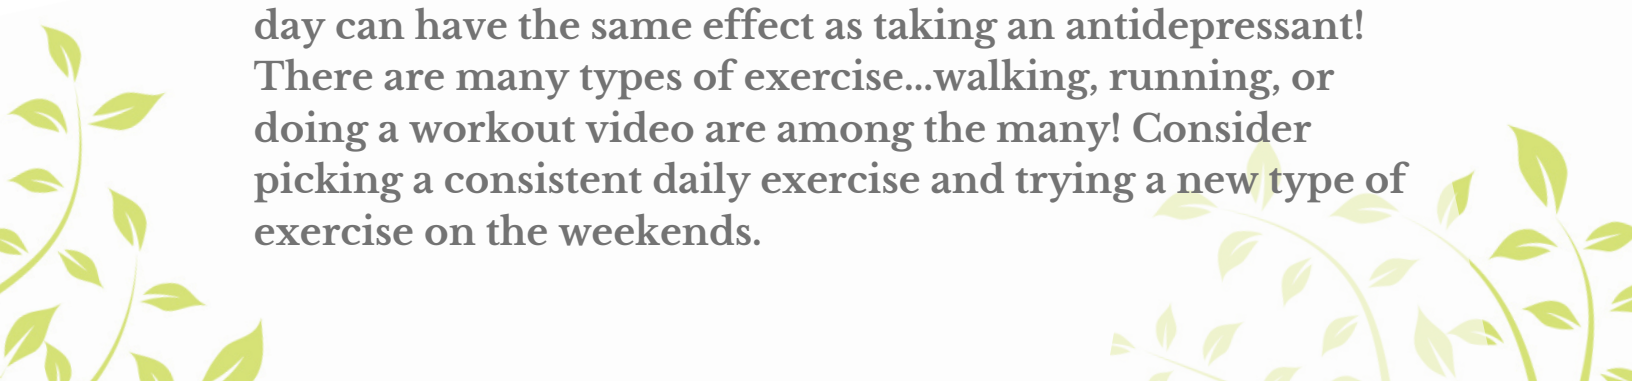

Sleeping too little and sleeping too much can both cause emotional and mental distress. Consider implementing a consistent wake and bed time.

drinking water

A general recommendation of water intake is to drink eight glasses of water per day. If this is a challenge, set a goal to gradually increase your water intake over time. Track your water intake in the daily journal and see your progress.

exercise

Exercise is essential to self-care during uncertainty. Moving your body regularly can help you maintain healthy chemical levels in your brain. This can help you avoid spikes in depression and/or anxiety. Studies actually show that getting your heart rate up for as little as 30 minutes a day can have the same effect as taking an antidepressant! There are many types of exercise...walking, running, or doing a workout video are among the many! Consider picking a consistent daily exercise and trying a new type of exercise on the weekends.

essential self-care strategies continued

fresh air

Getting outside at least once a day can help boost your mood. You'll have a reminder in your journal each day.

personal hygiene

Taking care of your personal hygiene helps provide normalcy. Even if you are not able to go out, consider getting ready just like you normally would.

emotion regulation

Regulating your emotions is essential during uncertainty. The first step in emotion regulation is being aware of how you feel. It's okay and normal to feel multiple emotions at one time, even if those emotions are contradictory. Make yourself aware of your emotions each day with the daily journal.

daily routine

Setting up a simple daily routine will help the days not blend together. It is helpful to set up a routine for weekdays and a different routine for weekends. This will help keep a feeling of normalcy during uncertainty. Remember, this is not a one-size fits all scenario. Do what works best for you!

extra self-care strategies

Adding one extra self-care strategy into your day can help keep you grounded, calm, and hopeful. Examples of extra self-care strategies include reading a book, lighting a candle, learning something new, etc.

Below make a list of extra self-care strategies you can do from home. The daily journal will prompt you to use one strategy from the list each day.

get inspired

Here's a list of extra self-care strategies you can use to get inspired to create your own list!

Soaking in the bathtub
Planning my career
Recycling old items
Relaxing
Jogging, walking
Listening to music
Recalling past parties
Lying in the sun
Laughing
Thinking about my past trips
Listening to others
Reading magazines or newspapers
Hobbies (painting, model building, etc.)
Planning a day's activities
Eating
Practicing karate, judo, yoga
House projects
Working on my car (bicycle)
Cleaning

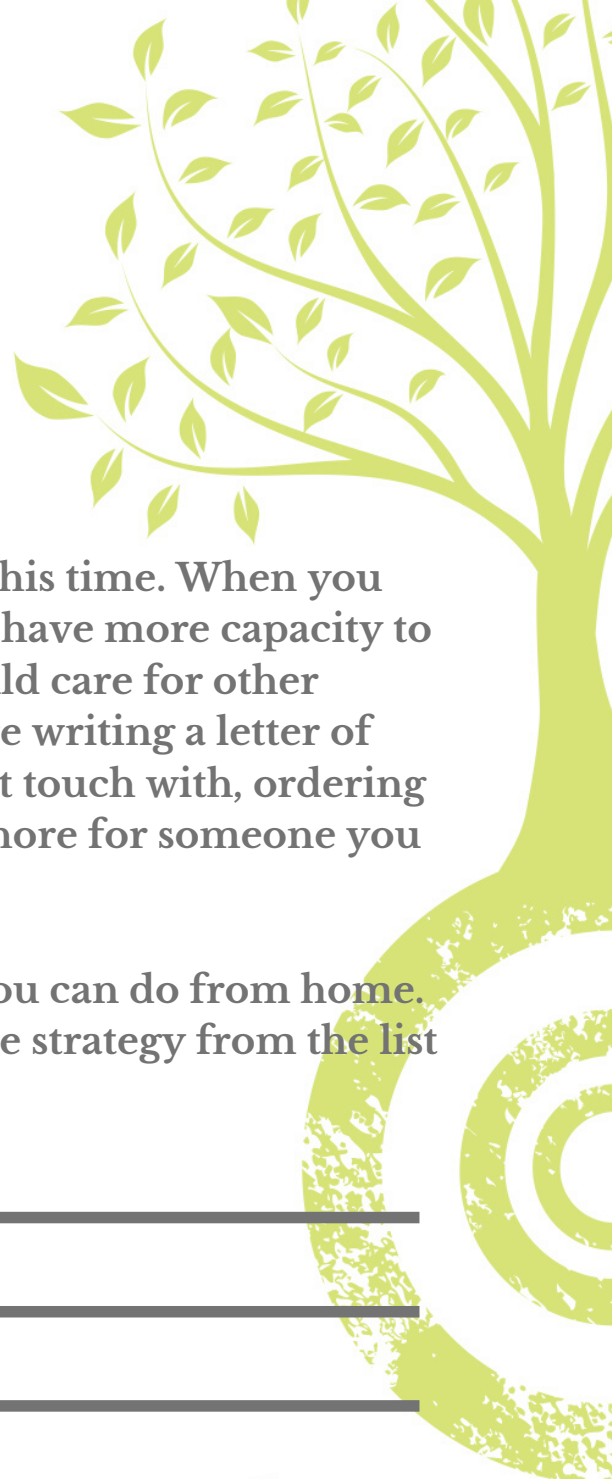

Remembering compliments
Praying
Having quiet evenings
Taking care of my plants
Doodling
Singing around the house
Arranging flowers
Sketching, painting
Doing something spontaneously
Playing musical instruments
Making a gift for someone
Cook a new recipe
Writing books (poems, articles)
Daydreaming
Refinishing furniture
Watching videos or DVDs
Making lists of tasks
Completing a task
Thinking about my achievements
Exchanging emails
Playing cards

other-care strategies

Caring for others is very important during this time. When you are intentional with your self-care, you will have more capacity to care for others. Create a list of ways you could care for other people. Examples of other-care strategies are writing a letter of encouragement, calling someone you've lost touch with, ordering groceries for an elderly neighbor, doing a chore for someone you live with, etc.

Below, make a list of other-care strategies you can do from home. The daily journal will prompt you to use one strategy from the list each day.

emotion regulation

Regulating your emotions will be important during this time. Below make a list of every emotion you can think of. Each day, your journal will ask you to identify how you feel. Use the list as a reference to help you identify every feeling.

self-assessment journaling prompts

Before you begin using the daily survival guide, take some time to respond to the following journaling prompts.

During uncertainty, fear is normal. What level would I rate my current fear and why?

What currently feels out of my control? How can I focus my mind on things I can control?

How well am I taking care of myself right now?

self-assessment journaling prompts

What is helpful about watching the news? What is unhelpful about watching the news?

How much time spent watching the news is best for me personally?

Do I need anything urgently? Is there a safe way for me to get what I need?

There are two main types of coping strategies: avoidant and active. Avoidant could include excessive drinking, shopping, gambling, or numbing out on social media. Active coping skills require that we engage in something different, rather than remaining in stress. -Kim DeRamus Lareau, LPC, CPCS
